

# Mahmoud Bakri AbdelSamea Ahmed

## Software Test Engineer | QA Engineer

Nasr City - Cairo – Egypt | Date of Birth: January 1st, 1999 | Military Service: Completed  
+201067861583 | [mahmoudbakri225@gmail.com](mailto:mahmoudbakri225@gmail.com) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

### Objective

---

**Detail-oriented Software Test Engineer** with hands-on training and project experience in testing web applications. Skilled in manual, functional, regression, integration, exploratory, API, and database testing, with knowledge of automation testing using Selenium WebDriver. Experienced in designing and executing test cases, reporting and retesting defects, validating database results, and using Jira, Postman, SQL, Chrome DevTools, and Git. Strong technical background in Java, C#, ASP.NET Core, SQL Server, and REST APIs, supporting effective collaboration with development teams and a solid understanding of application behavior.

### Experience

---

**Digital Egypt Pioneers Initiative (DEPI) | Ministry of Communications and Information Technology (MCIT).**  
**Software Testing Engineer Trainee | July 2026 – Present**

- Applied ISTQB v4.0 concepts throughout the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) within Agile/Scrum environments.
- Designed and executed test scenarios and test cases using Boundary Value Analysis (BVA) and Decision Table Testing.
- Conducted functional, regression, integration, and exploratory testing across web applications to validate requirements, functionality, and system behavior.
- Performed API and database testing using Postman, SQL, and SQL Server to validate API responses, application data, and database integrity.
- Performed static testing and managed defects using Jira, including defect reporting, tracking, retesting, and verification throughout the defect life cycle.
- Performed web UI inspection and basic automation using Chrome DevTools and Selenium WebDriver, including cross-browser and responsive testing.
- Conducted usability, accessibility, and basic performance testing to evaluate user experience, accessibility, responsiveness, and application performance.
- Developed and presented a comprehensive Capstone Project involving functional, regression, integration, exploratory, API, and database testing with documented test execution results.

### Skills

---

#### Technical Skills

- **Programming Languages:** Java, C#.
- **Web Development:** ASP.NET Core, ASP.NET MVC, HTML5, CSS3.
- **Testing Standards & Frameworks:** ISTQB v4.0 Standards, SDLC/STLC Integration, Agile/Scrum Testing.
- **Testing Types:** Manual, Functional, Regression, Integration, Exploratory, API, Database, Usability, Accessibility, Compatibility, Responsive, Basic Performance.
- **Test Design:** Test Cases, Test Scenarios, Boundary Value Analysis (BVA), Decision Table Testing, Requirement Analysis, Defect Reporting, Retesting.
- **Automation Testing:** Selenium WebDriver, Web UI Automation, Automated Test Cases.
- **API & Database Testing:** Postman, SQL, SQL Server, Data Validation, CRUD Testing, Database Integrity.
- **Development Technologies:** Entity Framework, LINQ, RESTful APIs.
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SOLID Principles, Design Patterns.
- **Tools:** Jira, Chrome DevTools, Lighthouse, Git, GitHub.

#### Interpersonal Skills

- Effective Communication, Team Collaboration, Time Management, Self-Learning, Problem Solving.

## Projects

---

- **Mina Online Store — Software Testing Project** [GitHub](#)
  - Web application testing project focused on the Add Product to Cart feature. Designed and executed 16 test cases, with 13 passed and 3 failed, and documented 4 exploratory testing findings. Performed functional, exploratory, static, accessibility, and basic performance testing using Chrome DevTools, Browser Console, Lighthouse, and GitHub.
- **Al-Sharkia COVID-19 Interactive Map & Advisory System — Graduation Project** [Source Code](#)
  - Expert system that detects and diagnoses COVID-19 symptoms and recommends the nearest hospital based on patient location. Awarded 1st Place in the Information Systems Department Graduation Projects Competition. Grade: Excellent.
- **Movies Platform** [Source Code](#)
  - Full-stack movie browsing application built with C# and ASP.NET Core. Features user authentication, category filtering, search functionality, and responsive UI. Demonstrates backend integration, database design, and frontend implementation.
- **CleanCheck**
  - Java-based code quality analysis tool that scans Java projects, applies registered clean-code rules, reports code quality issues in the console, and generates an HTML report for review and analysis.
- **Student Management System** [Source Code](#)
  - Console-based Java application for managing students, instructors, courses, enrollments, and grades. Supports adding, editing, deleting, and listing records, course enrollment, grade recording, and student GPA calculation through an interactive menu.

## Education

---

### Bachelor's Degree in Computer and Information Systems

Faculty of Computers and Information (FCI), Zagazig University | Aug 2017 – Aug 2021

Grade: Very Good with Honors

### Courses & Certificates

---

- Backend .NET Development - EraaSoft
- Backend .NET Development - Algoriza
- Java Development — DEPI
- C# Mastering Course — Udemy
- The Complete Microsoft SQL Server Course: From A to Z — Udemy
- Programming for Everybody (Python) – Coursera
- Java Object-Oriented Programming – Udemy
- The Web Front End Learning Guide — Udemy

### Language Skills

---

- Arabic: Native
- English: Very Good
